

## Our tanks

Bushmans original range of water tanks gives you access to the most cost-efficient water storage products available. Made in one piece, from UV stabilised polyethylene which complies with Australian standards for drinking water as well as food contact, Bushmans tanks give you long term performance you can rely on.

### Slimline Tanks

These tanks are perfect for suburban homes that have limited and very limited space. The short length of these tanks is ideal to fit between windows. One or two of these tanks can let you water the plants and/or wash the car.

### Tall Tanks

The tall round tank is suited for small spaces around suburban homes. These tanks provide good storage capacity, with minimum diameter space requirements. Ranging from 2,550L to 10,000L capacities these tanks are typically found on large town blocks.

### Round Tanks

The round tanks range from reasonable to high storage capacity allowing you to water your lawn and garden, top up the pool and right through to almost making your home independent of town water. Round tanks benefit from having minimum diameter space requirements.

### Squat Tanks

The squat tank is suited for sites that require a low water inlet height. These tanks provide excellent storage capacity and are priced reasonably. These tanks are well suited to rural properties or large town blocks where you require plenty of water storage.

## For residential applications

Doing your bit to save Australia's water and lower the cost of your water bills

Even when connected to town water, everyone wants to do their bit to save Australia's water – and nobody saves Australia's water like Bushmans. Their domestic water tanks are available in sizes from 1,000 litres (220 est. gallons) to 10,000 litres (2,200 est. gallons) and are easily installed on residential properties. Not only will these tanks give you rainwater when you want it but they will also complement the appearance of your home and add value, while you do your bit to save Australia's water. You can also choose from larger capacities up to 46,400 litres (10,200 est. gallons).

Bushmans original range of round tanks gives you access to the most cost-efficient water storage products available. Made in one piece from UV stabilized polyethylene, Bushmans tanks give you long term performance you can rely on.

I love my Bushmans tank, tuff as nails and water when I need it

## For rural applications

Water when you need it and the confidence of the Bushmans 10 year guarantee

When you rely on water for your business, indeed for survival, you have to have it when you need it. You can choose a Bushmans tank up to 46,400 litres (10,200 est. gallons) to provide water storage solutions for all your needs. You can't make it rain but you can store it when it does and nobody saves Australia's water like Bushmans.

Bushmans original range of round tanks gives you access to the most cost-efficient water storage products available. Made in one piece from UV stabilized polyethylene, Bushmans tanks give you long term performance you can rely on. Sizes range from 1,500 litres to 10,000 litres for residential purposes, and from 15,000 litres to 46,400 litres for agricultural and more rural domestic applications.

Bushmans has been manufacturing tanks for more than 21 years and when it comes to water storage, Bushmans delivers the goods in the toughest Australian conditions. You can rely on Bushmans to Save Australia's Water.

Included: leaf strainer, overflow and brass outlet. Also available: pumps, water diverters and leaf strainer covers. Molasses and Fertiliser Tanks: sizes vary from 1500 litres (330 gallons) to 38000 litres (8400 gallons).

Capacities and measurements are tested in accordance with AS4766, but may vary due to the roto-moulding process. Dimensions in metres are rounded to the nearest centimetre. Dimensions in imperial are rounded to the nearest inch. Subtract 100mm from pump cover dimensions when estimating internal measurements. Prices subject to change without notice. When estimating space requirements for siting your tank, Bushmans recommends a minimum clearance of 100mm at top and sides.
